

RMLD Energy Star Appliance Rebate Program

Reading Municipal Light Department

230 Ash Street
P.O. Box 150
Reading, MA 01867

To be eligible for an RMLD **ENERGY STAR** rebate, customers must:

- Have an active RMLD residential electric account for one year.
- Must be a customer with arrears free billing statements.
- Purchase only **ENERGY STAR** heat pump electric hot water heaters, refrigerators, washing machines, dishwashers, room air conditioners, central air conditioners, dehumidifiers, programmable thermostats and ceiling fans.
- Installation or purchase must have been within 1 year of requested rebate date.

In addition customer MUST PROVIDE:

Copy of sales receipts (attached)

Copy of ENERGY STAR labels (attached)

This offer is for one rebate per qualified ENERGY STAR appliance. RMLD offers a limit of two rebates on the purchase of programmable thermostats. The rebate will be automatically applied to your account. Appliance must be installed at the account location. RMLD reserves the right to inspect the premises.

RMLD offers the following rebates for a limited time only, subject to the availability of funding.

What's in the EnergyGuide label?

Appliance type, capacity and size.

Estimate of kilowatt-hour (kWh) use for this particular model.

Estimates of the appliance's annual kWh use (the lower the number, the more energy efficient the appliance and the less it costs to run).

An estimate of the annual cost to run this model.

Manufacturer and model number used to determine ENERGY STAR eligibility.

The ENERGY STAR symbol appears on the labels of most qualified appliances.

The range of ratings for similar models from "uses least energy" to "uses most energy." This scale shows how a particular model compares to others.

ENERGYGUIDE

Clothes Washer Capacity: Standard Model: Maytag MHW6000W

Compare the energy use of this clothes washer only with other models tested using the 2004 procedure.

This Model Uses 241 kWh/year

ENERGY STAR A symbol of energy efficiency

Energy use (kWh/year) range of all similar models

Uses Least Energy 113 Uses Most Energy 380

Millions (thousand) kWh per year is a measure of energy (electricity) use. You will know what to do to save you! Our standard clothes washer uses less in this scale.

Clothes washers using more energy cost more to operate. This model's estimated yearly operating cost is: \$27 \$19

Based on an 11 kWh of clothes kWh per year in 2005 U.S. Government national average cost of 4¢ per kWh for electricity used to be per kWh for gas use. Your actual operating cost will vary depending on your local utility rates and cost of the product.
