Reading Municipal Light Board of Commissioners

Regular Session 230 Ash Street Reading, MA 01867 August 26, 2009

Start Time of Regular Session: 7:35 p.m. End Time of Regular Session: 9:40 p.m.

Attendees:

Commissioners:

Mary Ellen O'Neill, Chairman Richard Hahn, Vice Chair Philip Pacino, Secretary Ellen Kearns, Commissioner

Staff:

Vinnie Cameron, General Manager
Jared Carpenter, Energy Efficiency Engineer
Jeanne Foti, Executive Assistant
Jane Parenteau, Energy Services Manager

Kevin Sullivan, Engineering and Operations Manager

<u>Citizens' Advisory Board:</u> Arthur Carakatsane, Chair

Introductions

Chairman O'Neill polled the Board to see if there were any changes to the agenda as presented for this evening's meeting. There were no changes to the agenda.

Chairman O'Neill introduced Citizens' Advisory Board, Chair, Arthur Carakatsane.

Presentation - Smart Grid - Mr. Sullivan and Mr. Carpenter - Attachment 1

Chairman O'Neill stated that Mr. Sullivan and Mr. Carpenter would be making the presentation on Smart Grid.

Messrs. Sullivan and Carpenter gave their presentation on Smart Grid.

Discussion ensued.

Chairman O'Neill thanked Mr. Sullivan and Mr. Carpenter for their presentations.

Approval of June 24, 2009 Board Minutes

Mr. Pacino made a motion seconded by Mr. Hahn to approve the Regular Session meeting minutes of June 24, 2009 as corrected.

Motion carried 4:0:0.

Approval of July 29, 2009 Board Minutes

Mr. Pacino made a motion seconded by Mr. Hahn to approve the Regular Session meeting minutes of July 29, 2009 as corrected.

Motion carried 4:0:0.

Ms. Kearns stated that she wanted to go on record that the minutes are down to four pages that are readable and understandable.

General Manager's Report

Mr. Cameron reported on the following:

NEPPA Conference September 20 to September 23.

Reading Street Fair – September 13 - RMLD will have a conservation booth.

The audited financials will be ready for the next meeting. The RMLD Board's Audit Committee in conjunction with Town of Reading Audit Committee will meet to go over the RMLD's financials in advance of the meeting. The Department will get back to the Board on the scheduling of Committee meetings.

Mr. Pacino said that the Town of Reading Audit Committee is meeting earlier in September and would like to explore the possibility that the RMLD audit results could be presented at that meeting. Mr. Pacino said that over the last couple of years the Town of Reading Audit Committee has not had a quorum to review the RMLD audit results.

The Capital and Operating Budget Committee needs to meet to go over the proposed transfers based on the audited financials.

The CAB has a meeting scheduled for September 14, 2009 for General Business.

Financial Report, June 2009 – Mr. Fournier – Attachment 2

Mr. Fournier reported on the unaudited financial report for June. Mr. Fournier reported that Melanson Heath will be at the September 30 Board meeting.

Mr. Cameron said that the following are based on Chairman O'Neill's questions: General Manager's Outside Services was over budget because the RMLD did not budget in fiscal year 2009 for the Cost of Service Study costs that came in. Mr. Cameron explained that on General Benefits/Outside Services \$7,800 the budget was \$5,000 an expert came in to assess the condition of the cooling towers. Mr. Cameron said that in the budget reforecast in two instances the numbers came out lower than they should have. The Miscellaneous General should have been \$8,000 whereas it came out at \$5,100. The Maintenance of Underground was over budget by 48%, \$104,000 versus \$155,000. Mr. Cameron will get back to Chairman O'Neill on this.

Ms. Kearns asked about the services provided by Fisbach & Moore for underground maintenance.

Mr. Cameron replied that RMLD budgets for Fischbach & Moore and are hired on an hourly basis to perform RMLD's underground work.

Mr. Carakatsane commented on the 22% overbudget in the Facilities Department.

Mr. Fournier reported that this was due to the Post Employment Benefit and the Sick Leave Buyback being higher than budgeted as well as capital overhead credit being less than budgeted.

Chairman O'Neill stated that she would like to see pages five and six on the Financial Report be adjusted in the same format to reflect similar information.

Mr. Cameron said that he would look into the format changes.

Chairman O'Neill asked about the levels of the Deferred Fuel Cash Reserve and the Rate Stabilization Fund.

Mr. Cameron replied that the Rate Stabilization Fund has been voted to be at the range of \$6.0 million to \$7.0 million. Mr. Cameron pointed out that the Deferred Fuel Reserve was at \$1.75 million and now the range is \$2.5 to \$2.9 million. Mr. Cameron noted that the Operating Fund's target is \$6 million.

Mr. Fournier explained that in order to close the books in June in accordance with GASB it is pro rated. Prior to the accrual, partial days in June that were in the July bill but incurred in June, the Deferred Fuel is at \$2.6 million. When he reversed out last year's activity and puts in this year's activity the Deferred Fuel went down \$900,000. In fiscal year 2008 the Fuel Charge in June was \$.084 and in fiscal year 2009 it was \$.059. The bulk of that is the adjustment to the Fuel Charge.

Assistance Programs for RMLD's Residential Customers - Laurie Cavagnaro

Chairman O'Neill said that Commissioner Kearns at the last meeting raised concerns about what type of programs were available for RMLD's residential customers who were in need of financial assistance. Chairman O'Neill said that Ms. Cavagnaro, Customer Service Manager will provide information.

Ms. Cavagnaro said that many customers are having a hard time paying their bills, however, the RMLD is sensitive to this and is willing to work with such customers.

Assistance Programs for RMLD's Residential Customers - Laurie Cavagnaro

Ms. Cavagnaro reported on the following programs that assist RMLD's residential customers:

Payment Plans

Customers must pay their current bill plus one quarter of the arrears with the goal of getting the customer current within three to four months.

Good Neighbor Energy Fund and Salvation Army

The RMLD will assists customers to fill out the appropriate applications and they can qualify for \$300 towards their electric bills

Fuel Assistance Programs

Most customers use the Fuel Assistance Programs to pay for oil and gas bills. However, RMLD does receive moneys if the customer has any remaining for their electric bills. Last year's guidelines enabled customers to get \$450 to \$1,300 depending on their income levels and subsidized housing customers could receive \$250 to \$650.

Referral to Church, Veterans and Local Agencies

The RMLD will also refer customers to churches, veterans and local agencies. A new referral is the "211" which enables customers to get assistance with food, utilities and rent.

Conservation

Another means the RMLD uses to assist its customers to lower their bills is to discuss with them energy conservation, mail out information on energy savings and schedule an energy audit if deemed appropriate.

Appliance Rebate Program

The RMLD will also discuss the current appliances a customer uses. The Customer Service Specialist explains when a customer may want to consider changing out an appliance that uses a lot of energy. The customer can get a rebate for an Energy Star rated appliance that will save on their usage as well.

Budget Billing

Customers need to be current in order to qualify for budget billing.

On another matter, Ms. Cavagnaro stated that the RMLD stays in close contact with its customers all year round including the moratorium period for shut offs.

Ms. Cavagnaro explained that the Customer Service Specialists will refer customers to the Engineering Department or Energy Services if that better serves the customers' needs.

Ms. Kearns asked what is the flashpoint for the customer when they realize they really need help?

Ms. Cavagnaro said that in the billing cycles customers do receive notices of delinquent accounts. The RMLD will look at the account and if it is the first time the customer shows non-payment they will receive a call although they have seven days to respond when they reach the termination point. Ms. Cavagnaro then explained the next phase of the collection process that leads to shut off. Ms. Cavagnaro did stress that shutting off a customer's electric service is the avenue of last resort for the RMLD.

River Energy performs residential audits for the RMLD and Energy New England performs commercial audits. A brief discussion followed.

Power Supply Report, July 2009 – Ms. Parenteau – Attachment 3

Ms. Parenteau presented the Power Supply Report for July.

Mr. Hahn asked if the transmission rates went up June 1 from the ISO?

Ms. Parenteau replied that the rate did go up in June. The monthly interchange from the ISO for July monthly interchange, includes June's transmission. There is a one-month lag.

Mr. Hahn wanted to clarify whether the June statement would be based on May's transmission charges.

Power Supply Report, July 2009 - Ms. Parenteau - Attachment 3

Ms. Parenteau replied that the RMLD projected this because the rate was not posted until June 1.

Ms. Kearns asked if the 32.6% increase in transmission costs would continue to increase.

Ms. Parenteau replied that it will stabilize and the only way to control this is to control the RMLD's peak that is based on a twelve-month average.

Mr. Hahn did point out that the RMLD would have to lower its peak lower than everyone else's to take advantage of more favorable pricing.

Discussion ensued.

Energy Efficiency Update – Mr. Carpenter – Attachment 4

Mr. Carpenter presented the Energy Efficiency Update for July.

Mr. Carpenter stated that he is more than willing to work with anyone who needs to reduce his or her energy consumption.

Discussion ensued.

Engineering and Operations and Gaw Update, June 2009- Mr. Sullivan - Attachment 5

Mr. Sullivan presented the Engineering and Operations and Gaw Update for July.

Chairman O'Neill asked what are the reasons for the thirty outages in July.

Mr. Sullivan replied that it is a combination of squirrels, car accidents and broken cutouts.

Chairman O'Neill said that in September there will be two reports, those for July and August 2009.

Mr. Cameron said that if the Financial Report is available then, the Capital Budget Report should be available.

Chairman O'Neill asked on the Gaw project if it is on track?

Mr. Sullivan replied that he is not sure but senses the schedule will be moved into the end of February as opposed to the end of January.

Chairman O'Neill asked when will Mr. Sullivan have a better idea of the timeline?

Mr. Sullivan replied in the fall.

Chairman O'Neill asked if this would change the timing of the last transformer change out, installation of that?

Mr. Sullivan replied that the change in schedule will affect the last transformer.

BOARD MATERIAL AVAILABLE BUT NOT DISCUSSED

Rate Comparisons, July 2009

E-Mail responses to Account Payable/Payroll Questions

Upcoming Meetings

Wednesday, September 30, 2009 RMLD Board Meeting Wednesday, October 28, 2009 RMLD Board Meeting

Citizens' Advisory Board Rotation

Chairman O'Neill will cover the Citizens' Advisory Board meeting on Monday, September 14, 2009.

Executive Session

At 9:00 p.m. Mr. Pacino made a motion seconded by Mr. Hahn that the Board go into Executive Session to discuss strategy with respect to litigation and return to regular session for the sole purpose of adjournment.

Motion carried by a polling of the Board 4:0:0.

Ms. Kearns, Aye; Mr. Pacino, Aye; Mr. Hahn, Aye; and Chairman O'Neill, Aye.

Adjournment

At 9:40 p.m. Mr. Pacino made a motion seconded by Mr. Hahn to adjourn the meeting. **Motion carried 4:0:0.**

A true copy of the RMLD Board of Commissioners minutes as approved by a majority of the Commission.

Philip B. Pacino, Secretary RMLD Board of Commissioners

Subject: Smart Grid at the RMLD

1.0 Summary

Smart Grid in the purest form is a general term referring to the individual components used for electric delivery and the ability of those components to communicate and operate interdependently. The term has developed into a buzz-word championed by the Federal Government in its quest for a more efficient means of generating and delivering power to consumers. The Federal Government is counting on the utility community at large to pioneer the Smart Grid effort. Many manufacturers have been marketing products designed to give utilities advancements in the Smart Grid product design.

Presently Smart Grid has no standards, no guidelines, and no protocols. The National Institute for Standards and Technology is working to develop standards for manufacturers to adhere to. The market offers an endless number of Advanced Metering Infrastructure (AMI) type meters that can provide voltage indication, time of use information, remote disconnection and pre-planned remote reads back to the utility's mainframe equipment. Each utility has been watching the myriad of options, deciding when the time is right and at what level this new technology should be embraced.

So too, the RMLD has been watching Smart Grid available technologies unfold. On the reliability side of the equation, Smart Grid system protection devices can isolate outages and mitigate the effect of an outage to a minimum amount of customers.

Also, Smart Grid metering can provide an instantaneous, electronic notification of customer outages and verification of re-energization, automatic disconnection and customer load profiling. Customers may also take advantage of Smart Grid instrumentation that enables access to information so that they can cut back on usage during periods of high electric usage and control their costs.

2.0 What Smart Grid reliability applications does the RMLD have presently?

The RMLD had begun its quest for products that offered advanced technologies long before the term 'Smart Grid' had been coined. The RMLD has fault detectors strategically placed on the sub-transmission lines that provide power to Wildwood Substation and a few of our distribution feeders. Fault detectors provide instant indication of excessive current flow, expediting the fault locating process. The installation of additional fault detectors is planned for FY'10.

Reclosers and auto-transfer voltage sensing equipment have been installed in areas that serve our largest commercial load to provide instantaneous isolation and transfer to a back-up feeder.

Sectionalizing fuses provide individual phase isolation to minimize complete circuit interruption, maintaining service to customers upstream of the fault.

The RMLD fiber-optic loop, which encircles the territory, provides communication from all substations back to the Control Center for Supervisory Control and Data Acquisition (SCADA) of circuit breakers, voltage and loading.

3.0 What Smart Grid energy conservation applications does the RMLD presently have in place?

The RMLD has added new programs to help with our Smart Grid endeavors. The Smart Grid is a very open idea at this point. However the goal of energy conservation through efficiency will always be a staple focus.

The existing and new programs that we have implemented are residential renewable energy rebate programs, which gives rebates for ENERGY STAR rated appliances.

The RMLD has a Time of Use electric rate, which through the use of time of use meters help customers shape their energy usage. The Time of Use rate is available for both the residential and commercial customers.

The Commercial Energy Initiative program is set up to help encourage and rebate customers who either install a renewable energy technology or set up a comprehensive plan to reduce peak kW demand. This program enables all commercial customers to take great steps forward in energy savings no matter how in-depth they are prepared to go.

4.0 What Smart Grid reliability applications should the RMLD look to in the future?

Reliability synergies that would enhance the RMLD are systems that work together to provide a technological network and products that offer a lengthened lifecycle.

The RMLD is exploring the use of remote operation of switching on the distribution system, which will allow the RMLD to mitigate the effects of systems outage and give the RMLD more flexibility in system operations, streamline maintenance, and will increase reliability.

5.0 What Smart Grid energy conservation applications should the RMLD look to in the future?

New technologies are constantly arising to assist in energy conservation. Understanding what will bring the greatest benefit in the most cost effective manner is difficult. The RMLD works together as a team to monitor new technologies and recommend them to our customers as needed.

One of the technologies we would like to encourage and perhaps rebate are residential energy monitors with in home displays along with time of use display. This technology will be viewable via the web and eventually provide control of lighting, thermostats, and other technologies in the home. This same technology is applicable to help with energy savings, security, and other important aspects of business for our smaller to mid-sized commercial customers.

Some of the newest technologies available for use that the RMLD would like to incorporate into customer use are magnetic bearing compressors, building automation systems, absorption chillers, Electronically Commutated Motors (ECM), natural light providing fixtures, magnetic induction lighting, and other energy efficiency and environmentally friendly measures.

The goal of our rebates are not only to provide financial help to encourage installation of efficient equipment but to encourage the growth of local companies and all technologies that provide the least harm to our worldwide environment.

6.0 Summary

As Smart Grid technology grows and becomes more focused, the RMLD will be prepared due to the planning and implementation steps that have already been put in place. The most important part of the Smart Grid is planning, forward thinking, and action. All of these steps and our knowledge are constantly growing as we search for additional options.

Our reliability and communication has consistently grown and is well beyond the national average. Customers often tell us our service and technology have gotten better and better. Our energy conservation goals are always being raised and we work daily with our customers meeting their needs to reduce their energy consumption. The RMLD is seeing newly interested solar customers on a weekly basis, preparing to start metering pilot test programs, and is noticing less reliability issues. Although there is no way to fully predict what the Smart Grid final product will be, we can all be certain that the RMLD is well out of the starting gate and has a firm grasp on what it will take to make our service meet all the needs of our customers.

Citizen's Advisory Board Jane Parenteau

Understanding the Smart Grid

(

Smart Grid Definition

devices and control of systems on the reliability and efficiency. Smart Grid A Smart Grid delivers electricity to consumers using technology to save is about communications between energy, reduce cost and increase grid.

1.0 Smart Grid Summary

- Electric meters provide:
- Real-time consumption information
- Automatic remote reads
- Automatic notification of service failure
- Distribution Automation provides:
- Increased reliability
- Fault detection and isolation
- Minimal customer interruption to situations affecting the distribution system

2.0 Existing Smart Grid Reliability Equipment

Reliability

- Fault detectors
- Sectionalizing fuses
- Reclosers and sectionalizers
- Voltage-sensing auto transfer equipment
- Supervisory Control and Data Acquisition

2.0 Existing Smart Grid Reliability Applications

- Fault detectors on 35kV sub-transmission lines and select feeders
- Sectionalizing fuses to isolate overhead phases
- Reclosers and sectionalizers isolate sections of circuits
- Voltage sensing auto-transfer switches minimize outage time by transferring to back-up feeder
- SCADA control and indication for all substations

8/19/2009

3.0 Existing Smart Grid Energy Conservation Applications

- ENERGY STAR appliance rebate
- Time of Use electric rate and meters
- Renewable Energy Rebate program
- Commercial Energy Initiative program

4.0 Future Reliability Applications

- Radio-operated distribution switches
- Reclosers
- Voltage-sensing auto-transfer equipment
- Real-time load measuring devices
- meter, the Billing Department and Outage Systems communication between each Management System

5.0 Future Smart Grid Energy Conservation Applications

New high efficiency equipment

- Magnetic bearing compressors
- Natural light fixtures
- · Building and motor energy management controls
- Electric vehicles
- Working with gas heating programs to provide comprehensive energy saving solutions
- And more as technology develops!

 ∞

O

6.0 The RMLD Understands the Smart Grid

- The Smart Grid will continue to grow
- Our towns' needs are changing
- Education
- Communication
- Planning
- Action

ATTACHMENT 2

To: RMLB, Vincent F. Cameron, Jr., Jeanne Foti

Fr. Bob Fournier Majulas

Sj: June 2009 Report

The unaudited results for fiscal year June 30, 2009, will be summarized in the following paragraphs. The auditing firm of Melanson Heath and Company, PC, will make their formal presentation at the September Board meeting. RMLD showed a positive change in net assets (net income) of \$447,000.00 which represents 1.0% of the allowable 8.0% rate of return.

1) Change in Net Assets or Net Income: (Page 3A)

Net income or the positive change in net assets for the year was \$447,000.00. The difference between the actual fuel expense and the actual fuel revenue is \$834,086.00, with revenues exceeding expenses.

2) Revenues: (Page 11B)

Base revenues for the year were over budget by \$858,564.00 or 2.25%. Actual base revenues were at \$39.0 million compared to the budgeted amount of \$38.1 million. The residential sector was mainly responsible for the increase.

3) Expenses: (Page 12A)

*Purchased power base expense for the year was over budget by \$2,914,525 or 12.43% due to increases in transmission and capacity costs. Actual purchased power base costs were \$26.4 million compared to the budgeted amount of \$23.5 million.

*Operating and Maintenance (O&M) expenses combined were over budget by \$981,398.00 or 9.78%. Actual O&M expenses were \$11.0 million compared to the budgeted amount of \$10.0 million. The major expenses that were over budget were employee pension and benefits \$631,000, due to the post employment benefit charge of \$436,000 and buyback sick leave increase of \$190,000. Bad debt expense was over budget by \$107,000.

*Depreciation expense and voluntary payments to the Towns were \$76,000 over budget.

4) Cash: (Page 9)

- *Operating Fund balance was at \$8,632,771.
- *Capital Funds balance was at \$4,403,129.
- *Rate Stabilization Fund balance was at \$6,237,223.
- *Deferred Fuel Fund balance was at \$1,739,394.

5) General Information:

FY 09 audit field work is completed. Auditors were here the week of 8/10. Kwh sales are down 21,604,117 or 3.1% compared to last year's actual. Cash year end transfers will be discussed in September.

6) Budget Variances:

The five divisions were over budget cumulatively by \$1,016,733, or 6.16%.

7) Trends:

The fuel charge remained unchanged at \$.059.

Purchase Power Summary - July, 2009

Energy Services Division (ESD) has completed the Purchase Power Summary for the month of July 2009. These figures are preliminary and actual numbers will be available after the fiscal year is balanced.

ENERGY

The RMLD's total metered load for the month was 63,578,146 kWhs, which was a decrease of 15.90 % compared to July, 2008 figures. The RMLD purchased 63,629,633 kWhs.

Table 1 is a breakdown by source of the energy purchases.

TABLE 1

	Amount of	Cost of	% of Total	Total \$	\$ as a

Memo

To: Jane Parenteau

From: Jared Carpenter 500

Date: August 19, 2009

Subject: Energy Efficiency Program Update

The purpose of this memo is to update the progress in the energy efficiency program.

With the implementation of renewable energy programs there is additional programs to begin setting up. The programs that are now released are the Commercial Energy Initiative and the Residential Renewable Energy Rebate program. One of the components to the programs is the Renewable Energy Credit program commonly known as REC's. Putting together a method to certify and retire the credits is the next step in our renewable energy programs.

Other projects the energy efficiency program is currently working on are as follows:

- -On going testing of new energy equipment. Currently 8 tests on new and existing equipment have been completed.
- -Examining installation of solar grid on RMLD territory for REC replacement and community outreach.
- -Customer energy consultations (commercial and residential)
- -Website energy efficiency data entry
- -Rebate program measurement and verification analysis

All of the above can be further expanded upon, and completion reports can be arranged if desired. Thank you.

Reading Municipal Light Department Engineering and Operations Monthly Report JUNE, 2009

FY 2009 Capital Plan

4 kV Retirement - Stepdown Areas

1. Reading – Walnut Street: continued transfers, installed and energized secondary cable

Sunnyside: Continued pulling rope; installed new secondary cable, spacers, anchor, replaced transformer, and transferred services to new cable.

Echo: Continued pulling rope.

Fairview/Pratt Streets: Installed pulling rope, secondary cable, transformers, and tied in primary. Also transferred services to new cable.

System Projects

- 2. Station #4 Getaway 4W30 Replacement Reading No activity this month.
- 3. Forest Street Wilmington Postponed to FY2011.
- **4. Salem Street Area Wilmington** Reconductoring continued: Switched load; replaced conductor; installed pole.
- 5. High Capacity Tie 4W18/3W8 Franklin Street Reading Carried over to FY2010.
- **6. Fordham Road Wilmington** Project continued: Built riser pole; installed switches; installed primary cable; installed rope; pulled in underground cable from manhole to riser; spliced; installed terminations; and did primary switching and phasing.

URD Upgrades

7. URD Completions – Sanborn Village, Reading; Perkins Farm, Lynnfield; and Chestnut Village, North Reading - No activity to-date.

New Circuits and Circuit Expansions

- 8. Salem Street to Glen Road Feeder Tie Wilmington Carried over to FY2010.
- 9. Reading Center Main Street Pulled in underground cable from manhole to new padmount at George Washington apartments and from padmount to vault; spliced; connected neutrals; and completed grounding
- 10. Reading Center Haven Street Area conversion (Main, Ash, Gould, and Green Sts).

Substation Upgrade Projects

- 11. Transformer Replacement Station 4
 - Part 1 Contractual Labor Engineering and design firm consultant invoices.
 - Part 2 Procured Equipment Transformer pads.
 - Part 3 RMLD Labor Chief Engineer and Senior Techs labor.
 - Part 4 Feeder Re-Assignment No activity to-date.
 - Part 5 Transformer Payments No further activity.

New Customer Service Connections

- 12. Service Installations Commercial/Industrial Customers This item includes new service connections, upgrades, and service replacements for the commercial and industrial customers. This represents the time and materials associated with the replacement of an existing or installation of a new overhead service, the connection of an underground service, etc. This does not include the time and materials associated with pole replacements/installations, transformer replacement/installations, primary or secondary cable replacement/installations etc. This portion of the project comes under routine construction.
- **13. Service Installations** Residential Customers This item includes new or upgraded overhead and underground services, temporary overhead services, and large underground development.
- **14.** Routine Construction The drivers of the Routine Construction budget category YTD are listed. This is not an inclusive list of all items within this category.

Pole Setting/Transfers	\$131,136
Maintenance Overhead/Underground	\$617,287
Projects Assigned as Required	\$541,945
Pole Damage (includes knockdowns) some reimbursable	\$ 61,862
Station Group	\$ 84,048
Hazmat/Oil Spills	\$ 21,048
Porcelain Cutout Replacement Program	\$ 56,445*
Lighting (Street Light Connections)	\$ 17,119
Storm Trouble	\$ 36,989
Underground Subdivisions	\$ 44,731
Miscellaneous Capital Costs	\$ 30,920
TOTAL	\$1,643,540

^{*}In the month of June, 8 cutouts were charged under this program. Approximately 30 cutouts were installed new or replaced because of damage making a total of 38 cutouts replaced this month.

29 - Force Accounts - The Commonwealth of Massachusetts requires utility plant equipment relocations in conjunction with various roadway reconstruction projects.

Reading Center Force Account Project – Connected new service to street light control cabinet and checked voltages.

Route 129 (Lowell Street) Project - No activity in June.

Reading Municipal Light Department Engineering and Operations Monthly Reliability Report JULY, 2009

Reliability Report

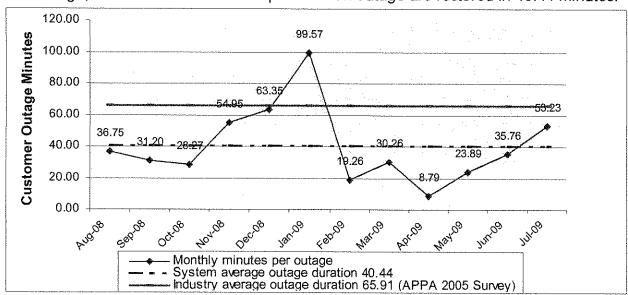

Two key industry standard metrics have been identified to enable the RMLD to measure and track system reliability. A rolling 12-month view is being used for the purposes of this report.

Customer Average Interruption Duration Index (CAIDI) – Measures how quickly the RMLD restores power to customers when their power goes out.

CAIDI = Total of Customer Interruption Duration for the Month in Minutes/ Total number of customers interrupted.

RMLD System CAIDI – 40.44 minutes Industry Average – 65.91 minutes per outage (APPA 2005 Reliability Survey)

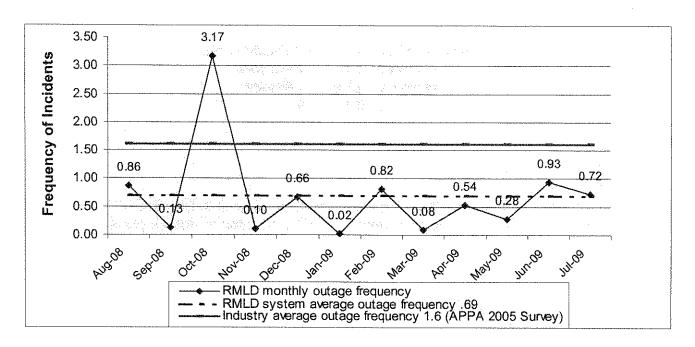

On average, RMLD customers that experience an outage are restored in 40.44 minutes.

System Average Interruption Frequency (SAIFI) – Measures how many outages each customer experiences per year on average.

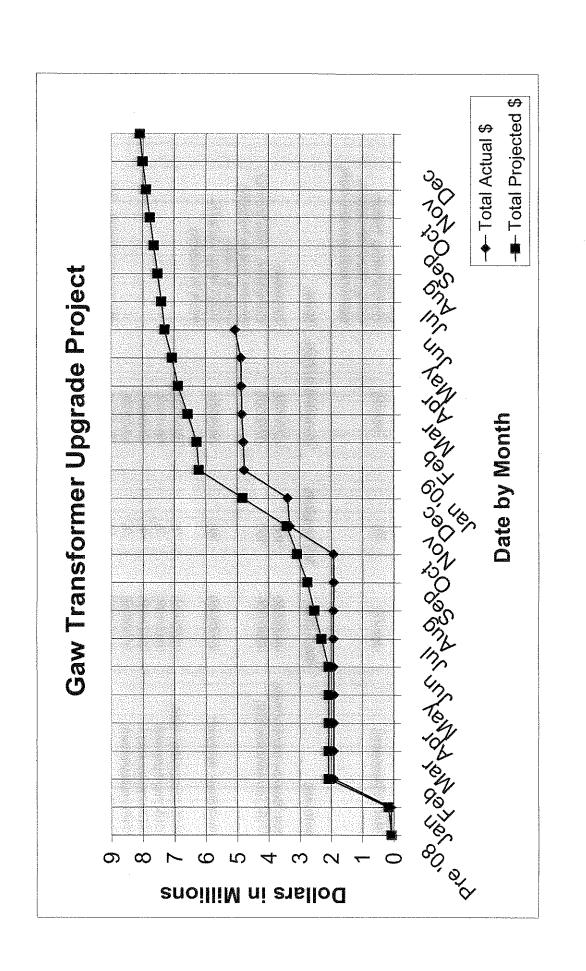

SAIFI = Total number of customer's interrupted / Total number of customers. RMLD System Average - .69 outages per year Industry Average - 1.6 outages per year (APPA 2005 Reliability Survey)

Top quartile performance for the industry is one outage or less per year. The graph below tracks the month-by-month SAIFI performance.

Months Between Interruptions (MBTI)

Another view of the SAIFI data is the number of months Reading customers have no interruptions. At this time, the average RMLD customer experiences an outage every 17.39 months.

Gaw Transformer Upgrade Project

Schedule Milestones	Start Date	% Complete	Completion Date	Notes
Conceptual Engineering Major Equipment Procurement	Jul-08 Feb-09	100	90-unf Nov-09	Complete Concrete, land materials, electrical conduit, piping, substation structures bid
Design Engineering Scheduled Transformer Delivery Construction Bid Construction Contractor Construction Transformer Replacement	Jul-08 Dec-08 Jan-09 May-09 May-09	100 100 12 15	Jun-09 Dec-08 Mar-09 Jan-10	Complete Complete Complete
Construction Switchgear Upgrades Construction RMLD Personnel	Oct-09 Jan-09	32	Jan-10 Jan-10	Specification sent out for bid 7/20 Control wiring, battery wiring, panel relocations, feeder reassignment work
Tangible Milestones	Start Date	% Complete	Completion Date	Notes
Relocate Station Service transformers Transformer 110C on concrete pad 115kV circuit switchers replaced	06/22/09	100 100	07/17/09 07/22/09 09/30/09	Complete Completed (new location creates space between 110A & 110B) 115kV lines are MTE. Work is weather
Transformer 110C secondary work Transformer 110C replacement Transformer 110A replacement Transformer 110B replacement	07/27/09 08/31/09 09/21/09 11/09/09	0000	09/11/09 09/18/09 11/06/09 12/25/09	
Switchgear upgrade	10/12/09	0	01/22/09	Bid opening 9/9/09. Bid classified for upgrade or new switchgear.
Feeder Reassignment work	07/01/09	0	12/31/09	Balances bus section and transformer loading
