Reading Municipal Light Department

Mission Statement

RMLD is committed to providing excellent customer service, including competitively priced electricity through due diligence of power supply, risk management, system reliability, safety, and overall business efficiency.

Vision Statement

RMLD has transitioned from a reactive to a proactive approach in all aspects of the utility business to ensure efficiency, safety, and competitive rates. The Be Efficient – Get Greener – Go Paperless, Peak Performance, and Shred the Peak, campaigns have been integrated into a core business and include sustained procedural changes in the areas of long-term planning, technology road mapping, talent managing, customer communication, system maintenance and power supply portfolio balancing.

SYSTEM PROFILE

(based on FY18)

	(00300 011112)						
SERVICE TERRITORY	51 square miles serving Reading, North Reading, Wilmington, and part of Lynnfield						
TOTAL OPERATING REVENUES	\$97,206,743						
POWER PURCHASED	674,894,793 kWh						
NUMBER OF CUSTOMERS/	29,775						
ACTIVE METERS	23,773						
ANNUAL PEAK DEMAND	145,294 kW on July 19, 2017, at 5:00 pm						
ANNUAL SALES	665,031,434 kWh						
DIANTMALLE	\$150,085,144 (Gross)						
PLANT VALUE	\$78,275,207 (Net)						
SUPPLY VOLTAGE	115 kV						
	Station 4:						
	(3) 60 MVA Transformers						
	(2) 35 MVA Transformers – feeds Station 5						
SUPPLY CAPACITY	250 MVA Connected, 190 MVA Firm						
	Station 3:						
	(2) 60 MVA Transformers						
	120 MVA Connected, 60 MVA Firm						
DISTRIBUTION SYSTEM VOLTAGE	13,800 volt wye						
DISTRIBUTION STSTEIN VOLTAGE	4,160 volt wye						
OVERHEAD PRIMARY LINES	All 336 miles						
UNDERGROUND PRIMARY LINES	All 144 miles						
DISTRIBUTION TRANSFORMERS	4,026 transformers – 310 MVA Capacity						
STATION TRANSFORMER CAPACITY	370 MVA Capacity

						FY19 Jul 2018-							
LINE #	Page #	Proj #	FERC #	PROJECT NAME	FY19 Budget	Dec 2018 Estimate	CY19 PLAN EST.	CY20	CY21	CY22	CY23	CY24	BRIEF DESCRIPTION
1	n/a	129	361	Master Facilities Site Plan (ON-HOLD)	Dauget	Lotimate	1 1 1 1 1 1 1 1	5.25	0.22	0.22	0.23	0.24	Town economic development plan impact. Master-hold. Evaluate maintenance only.
2	11 104 361 RMLD Lighting (LED) Upgrade Program		100		200						Upgrade Ash Street and other RMLD facilities including substations with new interior/exterior LED fixtures. A Designer will perform and energy audit and provide guidance with a Bid Spec. Installation of fixtures by an electrical contractor.		
3	13	140	390	Parking Lot Upgrade - 230 Ash Street	130		230						Reconfigure parking lot at 230 Ash Street to include accommodations for future connection for EV charging stations.
4	15	095	361	Building Upgrades			125	230	75	125	50	50	Lobby insulation; Station 4 AC; OSHA Compliance Study
5	17	098	391	Office Upgrades -230 Ash Street	30	32	120	30	30	30	30	301	Relocate Purchasing Division. Design and construct new purchasing offices. Reconfigure Facilities Division: design and construct new Facilities conference room.
6	19	119	384	Security Upgrades All Sites	30	30	30	30	30	30	30	30	Upgrades to existing Access Control equipment and alarm monitoring. Increase number of surveillance cameras at Substations. Repair perimeter fencing at all RMLD Properties. These security upgrades will be implemented over the next several years to always be incorporating the latest technologies and methodologies.
7	21	118	392	Rolling Stock Replacement (vehicles, trailers, fork trucks)	275		325	300	300	300	300	3001	Scheduled vehicle replacement based on Fleet Assessment. FY19 (carry-over): forklift, light duty pick-up, underground utility vehicle. All vehicles will be delivered in CY19.
8	25	099	392	Electric Vehicle Supply Equipment (EVSE)	10		60	60	60	60	60	1 ()() (Two electric charging station per town in the service area. Research grant options. CY24 install 3 charging station if popularity increases revenue.
9				DEMAND MANAGEMENT									
10	27	101	363	Battery Storage Unit at Station 3	100		20						5MW battery storage at Station 3. Substation integration into battery unit.
11	29	127	382	Hardware Upgrades	125	49	78	119	119	119	119	119	General hardware purchases, wireless internal network configuration.
12	31	128	383	Software and Licensing	425	174	405	239	239	239	239	2391	General software purchases/custom programming. Substation Asset Management software, work order management system, etc.
13	n/a	109	366	35kV UG Cable Upgrade at Station 4, Station 5 and RR ROW	252					252	322		Postponed pending new Wilmington substation.
14	34	102	367	Pad-mount Switchgear Upgrade at Industrial Parks	436	262	436	449	449	449	180		Starting in FY18, replace all 15 kV pad-mounted switchgear at industrial parks (i.e., River Park Drive, Jonspin Road, Haven Street, etc.) There are 29 switches system-wide.
15	36	103		GRID MODERNIZATION & OPTIMIZATION									Fifteen-year plan to implement Technology Road Map for grid efficiency, reduction of losses, etc.
			365	Scada- Mate Switches	301	118	267	275	283	292	300	309	4 switches/year plus IntelliTeam licenses
			365	IntelliRupter®	135	74	125	128	132	136	140		2 switches/year plus IntelliTeam licenses
			383	SCADA Upgrade	21								Software upgrade
		-	383	CapBank Automation	66	33	66	30	30	30	30		Adding feeder cap banks and making them SCADA controlled
			383	Software Integration	14	7	14	15	20	20	20		Integration of AMI/Scada-Mate switches/OMS
			383	Outage Management System (OMS)		26							Outage Management System and supplemental modules to automate outage response and customer/public communication during outage events.
			383	OMS Module: IVR	138	38	52						IVR in progress in FY19 - scheduled for completion in CY19.
		-	383	OMS Module: Crew Management			60						
			383	OMS Module: Power Factor Correction				50					
16	43	105		NEW WILMINGTON SUBSTATION									
		-	360	Purchase Land in Wilmington	151	511							Land purchase, land appraisals, environmental permitting.
			362/ 367	Wilmington Substation Construction & Commissioning			69	4,473	4,738				Conceptual design of substation and getaway, permitting. Estimated Total Cost: \$9.8m (\$81k spent through FY18)
17	n/a	n/a	364/ 365	Ballardvale Street, Wilmington - Pole Line Upgrade	225								No Longer Necessary due to anticipated location of Wilmington Substation. Previously budgeted FY19-20.
18	52	124	364/ 365	MA-125 Pole Line Installation for New Wilmington Substation		5	5	613					This project covers an estimated 3,000 foot pole line that will span MA-125 from Ballardvale Street to Andover Street, which will be used for riser pole getaways from the proposed Wilmington substation, and will interconnect the new substation to RMLD's existing overhead distribution system.
19	n/a	TBD	365	Distribution Improvements Associated with New Wilmington Substation					300	300			The proposed Wilmington substation's main objective will be to feed the existing Station 5 circuits. The new station will be designed for growth of load on Station 5 circuits, and will provide capacity relief to Stations 3 and 4. This line item will account for distribution improvements to provide load relief to Stations 3 and 4.

LINE #	Page #	Proj #	FERC #	PROJECT NAME	FY19 Budget	FY19 Jul 2018- Dec 2018 Estimate	CY19 PLAN EST.	CY20	CY21	CY22	CY23	CY24 BRIEF DESCRIPTION
20	45	TBD	364/ 365	Force Account (MassDOT): Main & Hopkins, R	225	3	225					Mass DOT project to widen Main Street and install traffic lights.
21	54	120	367	Underground Line Extension, Marion Street, W			102					Extend underground line (2,050 feet) on Marion Street in Wilmington to meet with three-phase URD.
22	56	121	365	5W5 Andover Access Road Upgrade, W			89					Upgrade 1,000 feet of open wire primary to 556 AL spacer to improve reliability of 5W5 cable between Andover Street and Salem Street along I-93.
23	58	130	397	211-503 and 211-504 Fiber Line Extension to Substation 4			534					Fiber to support NPCC Directory 1, relay protection upgrades.
24				GETAWAY REPLACEMENTS								
25	46	122	364/ 367	4W5/4W12 Getaway Improvements	152	142	117					Station 4: Improvements to result in added capacity to 4W5/4W12 and all south-side circuits at Station 4.
26	48	132	364/ 367	4W6 Getaway Replacement	157	,	157					Station 4: Upgrade approximately 1,700 circuit feet of UG cable on West Street, R to 750 mcm cu for increased reliability an capacity per Booth Reliability Study recommendations.
27	50	135	364/ 367	4W16 Getaway Replacement	206	5	206					Station 4: Upgrade approximately 2,250 circuit feet of underground cable on Causeway Road/Lowell Street to 750 mcm cu for increased reliability and capacity.
28	n/a	TBD	364/ 367	4W28 Getaway Replacement						316		Station 4: Replace 3,400 feet of underground getaway to 750 mcm cu for increased reliability.
29	n/a	TBD	364/	5W4/5W5 Getaway Replacement						119		Station 5: Upgrade feeders from substation to risers to increase feeders' ampacity. This project will be revisited after the new Wilmington Substation is built.
30	n/a	TBD	364/ 367	4W7 Getaway Replacement							177	Station 4: Replace 1,900 feet of underground getaway to 750 mcm cu for increased reliability.
31	n/a	TBD	364/ 367	4W10 Getaway Replacement							177	Station 4: Replace 1,900 feet of underground getaway to 750 mcm cu for increased reliability.
32	n/a	TBD	264/	4W4 Getaway Replacement								316 Station 4: Replace 3,400 feet of underground getaway to 750 mcm cu for increased reliability.
33	60	112	370	AMI Mesh Network Expansion & Meter Replacement	121	. 52	300	300	300	300	300	Install relays, meters, and/or retrofit kits to expand the AMI mesh network. Replace or retrofit 1,600 residential and small commercial meters, and 1,900 commercial meters. This will allow for end-of-the-line voltage readings.
34	62	126	397	Communication Equipment (Fiber Optic)	49	25	49	50	50	50	50	50 Materials to accommodate expanded use of fiber optic network for distribution automation and Eaton AMI system.
35	64	111	362	Substation Equipment Upgrade	50	50	66	30	30	30	30	30 Upgrade various equipment at substations. CY19 - 115kV grounding equipment Station 3 and 4.
36	66	115	395	Power/Lab and Tool Equipment	76	28	84		68	20	20	Purchase phasing meter/hi-pots, meter accuracy tester for commercial meters, 4-point battery hydraulic press, ratchet cutters, phasing tool.
37	68	117	370	Meters	60		80	60	60	60	60	60 Purchase meters for stock - new construction, upgrades and failures.
38	70	116	368	Transformers and Capacitors	583	132	617	617	617	617	617	Purchase units for stock, new construction and proposed reliability projects.
39	72	175	364	Pole Replacement Program, R and NR	263	132	263	271	279	288	296	Replace poles identified through the Pole Inspection Program (700 poles/year inspected). This will include transfers and replacement of secondary services as necessary. Fifty poles scheduled for replacement each year.
40	74	458	365	Secondary and Main Replacement Program - All Towns	344	114	344	252	238	344	316	Repair as necessary secondary/main services and connectors prioritized by age as determined by system-wide inspection. CY19: Gerry Road and Drury Lane Area, LC, and Thomas Road Area, LC (in conjunction with Stepdown area upgrades)
41	77	107	365	13.8kV Upgrade (Step-down Area, etc.) - All Towns	331	. 109	331	452	216	613	367	Convert step-down areas to 13.8kV. Remove antiquated equipment and step-downs to lower losses and improve system efficiency. CY19: Gerry Road and Drury Lane Area, LC, and Thomas Road Area, LC (in conjunction with Secondary and Mair Replacement Program)
42	80	106	367/ 368	UG Facilities Upgrades (URDs, Manholes, etc.) - All Towns	332	180	332	475	529	501	623	Replace primary and neutral cables and pad-mount transformers as needed in various aging URDs. Improved reliability. Fo the next five years, three subdivisions are planned to be upgraded per year. CY19: Arlene/Ella/Franklin area in Wilmington Carter/Willard area in Lynnfield; and Sandspur Lane in North Reading.
43	84	various	369	Service Connections (Residential and Commercial) - All Towns	142	. 71	142	147	151	156	160	165 Install new and upgraded residential and commercial services as requested.
44	86	various	various	Routine Construction - All Towns	1,078	539	1,078	1,110	1,143	1,177	1,213	Miscellaneous capital expenses including: overhead and underground system upgrades, pole hits, station upgrades, porcelai cutout replacements, street light connections (new equipment), pole setting/transfers, new construction (underground divisions)
45	n/a	TBD	362/ 367	Analog Devices Substation						1,000	1,000	Partnership with Analog to build a dedicated substation with feeds to back up feeders out of Substation 4.
46	n/a	TBD		4W24 Partial Circuit Reconductoring								656 Station 4: Upgrade main feeder of circuit 4W24 to 556 to address voltage and conductor capacity issues.

FACILITIES PROJECTS

Project Name: RMLD Lighting (LED) Upgrade Program Project #: 104

Project Schedule: CY19 Project Manager: Paul McGonagle,

Facilities Manager

Reason for Expenditure:

Upgrade the existing lighting at 230 Ash Street, 218 Ash Street, and the substations with new LED fixtures. Energy use will be reduced when switching to LED. This will include interior and exterior light fixtures at the Ash Street campus, including all office spaces, the garage and bay area, and all lighting at the substations.

Brief Description/Scope:

An electrical designer has performed an energy audit specific to the lighting. In CY19 an electrical designer will develop specifications, and an electrical contractor will perform the installation of LED light fixtures at the Ash Street office building, garage, and campus site lighting. Also included as part of this project, all lighting at the substations will be upgraded to LED.

Barriers:

None anticipated at this time.

Change in Scope of Work From Prior Fiscal Year:

The scope includes the installation of new fixtures by an electrical contractor.

Status Update:

 PROJECT NAME:
 RMLD Lighting (LED) Upgrade Program

PROJECT TOTAL:	\$200,000

Project Name: Parking Lot Upgrade - Ash Street Project #: 140

Project Schedule: CY19 Project Manager: Paul McGonagle,

Facilities Manager

Reason for Expenditure:

In FY18, an engineering firm was hired to engineer and design the reconfiguration of the existing customer parking lot at 230 Ash Street. The design includes relocated parking spaces, new drainage fixtures, landscaping, and additional connections for future EV stations.

Brief Description/Scope:

An engineering firm will develop construction drawings and bid documents for the construction of the parking lot, and installation of conduit and wiring to accommodate future installation of additional charging stations, landscaping, line striping, and signage. A contractor will then be hired to perform the parking lot construction.

Barriers:

Unforeseen schedule changes. Interruption of the right-of-way adjacent to the parking lot.

Change in Scope of Work From Prior Fiscal Year: Increase (Decrease)

Not applicable.

Status Update From Prior Fiscal Year:

Project Name: Security System Upgrades – All Sites **Project #**: 119

Project Schedule: Annual Project Manager: Paul McGonagle,

Facilities Manager

Reason for Expenditure:

The original access control system was installed in 1994 and was replaced in 2016 with a new open-source software system to provide more flexibility to adapt to the changing needs of the RMLD. Funds should be available to continually update equipment and perform maintenance and repair work on both the access control and the surveillance systems at the Ash Street campus and substations.

Brief Description/Scope:

Access control and surveillance systems upgrades over the next year:

- Install additional cameras at substations.
- Repair damage fencing and gates at station 4.
- Install additional DVR's to accommodate new cameras.
- Repair/replace exterior doors at the 230 Ash Street Campus.

Access control and surveillance systems upgrades over the next five (5) years:

- Add security fencing to server room
- Repair and replace card readers as needed annually
- Upgrade a portion of high-definition cameras annually as needed
- Upgrade cabling
- Repair/replace site lighting
- Re-key buildings and sensitive areas annually as needed

Barriers:

None anticipated at this time.

Change in Scope of Work from Prior Fiscal Year:

Not applicable.

Status Update:

Project Name: Rolling Stock Replacement Project #: 118

Project Schedule: Annual Project Manager: Paul McGonagle,

Facilities Manager

Reason for Expenditure:

Replace vehicles based on an eight to ten-year cycle to reduce maintenance costs and improve reliability. Vehicles removed from the fleet will be traded-in to the dealer providing the new vehicle.

Brief Description/Scope:

Specifications, bids, and purchase orders will be completed for CY19 delivery of the following:

- one (1) new forklift with trade-in of one (1) 1999 Yale forklift
- one (1) new pick-up truck with trade-in of one (1) 2009 Ford F150
- one (1) new underground utility vehicle with trade-in of one (1) Ford E350

Barriers:

None anticipated at this time.

Change in Scope of Work from Prior Fiscal Year: Increase (Decrease)

Not applicable.

Status Update:

Long lead-time for bid and purchase of rolling stock does not allow for the receipt of any of the items budgeted for FY19 by the end of December 2018. Therefore, all planned purchases for FY19, will be received in CY19.

INTEGRATED RESOURCES DIVISION PROJECTS

Project Name: Electric Vehicle Supply Equipment (EVSE) Project #: 099

Project Schedule: CY19 Project Manager: Jane Parenteau, Director of

Integrated Resources

Reason for Expenditure:

RMLD will plan to install EVSEs in each of the four towns in the service territory. This will increase RMLD's kWh sales.

Brief Description/Scope:

Each EVSE is a dual charger. RMLD will work with each town to determine interest in locating units within the town and the appropriate location. RMLD will plan to install two EVSE chargers per year.

Barriers:

None anticipated at this time.

Change in Scope of Work From Prior Fiscal Year:

RMLD has increased the number of charging stations to be installed to two per year.

Status Update:

In FY18 RMLD installed the first EVSE at the RMLD offices located at 230 Ash Street, Reading.

 PROJECT NAME:
 Electrical Vehicle Supply Equipment (EVSE)

PROJECT TOTAL:	\$60,000
----------------	----------

Project Name: Battery Storage Unit - Station 3, NR Project #: 101

Project Schedule: FY19-CY19 **Project Manager:** Tom Ollila, Integrated

Resources Engineer

Reason for Expenditure:

RMLD has been awarded a three-year, \$1m grant from Mass Department of Energy Resources (DOER) to install a 5 MW (10 MWh) grid scale energy storage system at the North Reading substation to provide peak shaving services. The goal for commercial operation date is no later than June 30, 2019. Project contracts, license agreements, system impact study, etc., are now underway or in negotiations. A revised amount of \$20,000 has been allocated to the Capital Budget for RMLD capital expenses related to interconnection costs associated with this project.

Brief Description/Scope:

RMLD is still in the conceptual design stages of the project. However, at this point, it is understood that RMLD will need to install infrastructure that will allow the battery unit to connect to the RMLD distribution system. It appears the interconnection will be directly connected into RMLD's substation. However, in addition to this interconnection, this project may also include additional infrastructure for the battery station service, which may be fed overhead by a pole line nearby Station 3. The \$20,000 accounts for worst-case scenario for these potential capitals costs as RMLD works with Nextera to finalize the design. These costs may ultimately be reimbursed by Nextera.

Barriers:

Finalizing energy storage agreement.

Change in Scope of Work From Prior Fiscal Year: Increase (Decrease)

Not applicable.

Status Update From Prior Fiscal Year:

INFORMATION TECHNOLOGIES PROJECTS

Project Name: Hardware Upgrades Project #: 127

Project Schedule: Annual Project Manager: Mark Uvanni, IT Manager

Reason for Expenditure:

This is an amount annually reserved for failed and/or obsolete computer and related equipment. This budget item is also used for unforeseen purchases, which may be necessary.

Brief Description/Scope:

In addition to the standard hardware purchases described above, we anticipate network updates to the wireless mesh.

Barriers:

None anticipated at this time.

Change in Scope of Work From Prior Fiscal Year:

Not applicable.

Status Update:

PROJECT TOTAL:	\$78,000

Project Name: Software and Licensing Project #: 128

Project Schedule: Annual Project Manager: Mark Uvanni, IT Manager

Reason for Expenditure:

Each year RMLD must renew existing software licenses and purchase new software, either to update existing users or for new users. Additionally, new software may be added at the request of various operating units. This item includes these ad hoc purchases as well as more specific items (outlined below) which are anticipated at this time.

Brief Description/Scope:

In addition to the standard software and licensing purchases described above, we anticipate the following:

- Custom programing/development for GIS/GPS, OMS, fixed network, AMI, IVR and continued CIS integration.
- Substation asset management software to track and trend RMLD's substation assets testing and maintenance. This software could also provide mobile deployment of tablets to upload test results.
- Work Order Management System. This will be fully integrated with our existing ERP software and to ESRI GIS. This will be a two-year project, with \$75,000 budgeted each year (CY19 and CY20).

Barriers:

None anticipated at this time.

SYSTEM PROJECTS

Project Name: Pad-mount Switchgear Upgrade at **Project #:** 102

Industrial Parks

Project Schedule: FY18-CY23 **Project Manager:** Peter Price,

Senior Distribution Engineer

Reason for Expenditure:

Increase distribution system protection in the underground industrial parks in Wilmington and North Reading as well as the three-phase underground distribution areas in Reading, i.e., River Park Drive, Jonspin Road, Haven Street, Woburn Street, Industrial Way, etc.

Brief Description/Scope:

Purchase new units to replace live front pad-mounted switchgear. New units will be dead front with provisions for remote/supervisor control. There are currently 29 units systemwide. In CY19 we are planning to purchase and replace (5) units.

Barriers:

None anticipated at this time.

Change in Scope of Work From Prior Fiscal Year: Increase (Decrease)

Not applicable.

Status Update From Prior Fiscal Year:

In FY18 the Department replaced a total of four (4) switches:

- Switch-1 on Jonspin Road, Wilmington
- Switch-2 on River Park Drive, North Reading
- Switch-2 and Switch-3 on Concord Street, North Reading

 PROJECT NAME:

Project Name: Grid Modernization & Optimization Project #: 103

Project Schedule: On-going Project Manager: Hamid Jaffari, Director of

Engineering & Operations
Peter Price, Senior Distribution

Engineer

Brian Smith, Senior Distribution

Engineer

Reason for Expenditure:

In compliance with DPU/OSHA Order DPU 12-76B, increase system reliability, modernize/optimize system operation and functionality, decrease system losses and expenses for labor and truck rolls related to outage management.

Brief Description/Scope:

Continue implementation of grid modernization/optimization road map including installation and integration of smart switches, IntelliRupters, and capacitor banks and controls. Installation and integration of outage management system (OMS) with an IVR system to optimize outage restoration process. Cyber security, simulator, fiber rationale connection, fault detection, economic dispatch, and overall system integration, including GIS and AMI.

Barriers:

Technology/software integration; merging old technology with new emerging technology.

Change in Scope of Work From Prior Fiscal Year:

Not applicable.

Status Update:

A total of twelve SCADA-Mate switches and two IntelliRupters have been installed. The outage management system (OMS), customer portal and outage dashboard, and WebSurv have been installed and are operational internally. Testing and system adjustments are ongoing.

-----------------------	-----

Project Name: New Wilmington Substation Project #: 105

Project Schedule: FY17-CY21 Project Manager: Manole Agouridis,

Distribution Engineer

Reason for Expenditure:

Substation 5 has reached the end of its useful life. The transformer and switchgear need major upgrades / repairs to keep substation operational. The new Wilmington substation will be a replacement for Substation 5, while also providing added benefits to RMLD.

Brief Description/Scope:

Install a new 115kV / 13.8 kV substation in Wilmington in the Ballardvale area. The new substation will include two (2) 60 MVA transformers and 15kV switchgear with eight (8) (or more as needed) feeder breaker positions. It shall also provide backup and load relief for both Substation 3 and Substation 4.

Barriers:

Availability of land.

Change in Scope of Work From Prior Fiscal Year: Increase (Decrease)
Not applicable.

Status Update From Prior Fiscal Year:

RMLD continues to explore options for location of the new substation.

 PROJECT NAME:
 New Wilmington Substation

PROJECT TOTAL:	\$68,720

Project Name: Force Account - Massachusetts Department Project #: TBD

of Transportation: Main and Hopkins, R

Project Schedule: CY19 **Project Manager:** Peter Price,

Senior Distribution Engineer

Reason for Expenditure:

The Massachusetts Department of Transportation has notified RMLD of a project that may be planned for CY19. We are reserving an amount in the Capital Budget for this project.

Brief Description/Scope:

MassDOT has plans to improve the traffic flow at the intersection of Main Street and Hopkins Street in Reading. This plan includes the widening of Main Street and the installation of traffic signals. This project will require the RMLD to relocate up to 12 poles and petition and install up to 3 guy poles along Main Street and Hopkins Street. This project may require the installation of laminated poles.

Barriers:

Verizon set area. Some poles will need to be petitioned. MassDOT will need to secure easements as needed for poles, anchors and guys at several locations. Project also involves the relocation of the UG service to the restaurant at 107 Main Street.

Change in Scope of Work from Prior Fiscal Year: Increase (Decrease)

Not applicable.

Status Update From Prior Fiscal Year:

Project Name 4W5/4W12 Getaway Improvements Project #: 122

Project Schedule: FY19 -CY19 Project Manager: Manole Agouridis,

Distribution Engineer

Reason for Expenditure:

The RMLD considered combining two (2) different projects into one larger project. The first of the two projects was to investigate and ultimately move forward with improvements to accommodate added load at Analog. The second project was an underground getaway maintenance project that would ultimately result in the replacement of underground getaway cables per RMLD's underground maintenance program. The objective of this project is to have the 4W5 and 4W12 circuits be separated from the existing south side duct bank and run them from Station 4 to West Street overhead via the existing pole line currently being utilized by the 4W12. This will improve the ratings of the 4W5 and 4W12 circuits drastically, while also improving the rating of the remaining six (6) circuits in the south side duct bank due to reduced heating.

Brief Description/Scope:

Install a cable tray system and associated hardware at Station 4. Install two (2) riser poles within the property at Station 4, this will include the associated feeds from Station 4. Upgrade the pole line from Station 4 to West Street, including upgrade of up to ten (10) poles, installing four (4) new poles, and running a new circuit an estimated 1,250 feet in length. Perform all overhead line work to tie the new riser poles to the existing overhead distribution on West Street. Also remove some Town of Reading public shade trees to accommodate a section of the new overhead line.

Barriers:

The RMLD is currently requesting approval from the Town of Reading to remove four (4) public shade trees. The result of this may have an effect on the scope and feasibility of the project.

Change in Scope of Work From Prior Fiscal Year: Increase (Decrease)

This project replaces the 4W5 Getaway Replacement project, which was budgeted for FY19 at a cost of \$151,894. The expanded scope of this project adds \$107,903 to the project.

Status Update From Prior Fiscal Year:

PROJECT TOTAL:

Project Name: MA-125 New Pole Line Installation for **Project #:** 124

New Wilmington Substation

Project Schedule: FY19-CY20 **Project Manager:** Manole Agouridis, Distribution Engineer

Reason for Expenditure:

To construct a pole line to interconnect the proposed Wilmington substation to RMLD's existing distribution system. The new pole line shall go from the proposed Wilmington substation, west to Ballardvale Street, and east to Andover Street. This shall include design, labor, and materials for all overhead line construction for this purpose.

Brief Description/Scope:

The aforementioned reason for expenditure covers an estimated 3,000 foot pole line that shall span MA-125 from Ballardvale Street to Andover Street. An estimated 30 poles shall be required. This pole line shall be used for riser pole getaways from the proposed Wilmington substation, and shall interconnect the new substation to RMLD's existing overhead distribution system. Budgeted costs in FY19 and CY19 are associated with design, permitting, and approvals. This project **shall exclude** design, labor, and materials for underground getaways, ducts banks, cables, isolation disconnects and associated work at riser poles which shall be included in "New Wilmington Substation" budget line item.

Barriers:

This project shall coincide with the proposed Wilmington substation. If the location of the substation is moved, this capital project shall be revisited/reprioritized accordingly.

Change in Scope of Work From Prior Fiscal Year: Increase (Decrease)

Not applicable.

Status Update From Prior Fiscal Year:

CY20 ESTIMATED SPENDING	\$613,464

Project Name: Underground Line Extension Project #: 120

Marion Street, W

Project Schedule: CY19 Project Manager: Vaughan Bryan,

Distribution Engineer

Reason for Expenditure:

The current underground line is a single phase line that serves Marion Street and Eleanor Drive. A 25-lot subdivision is being added to the end of Eleanor Drive with a another 16 plus acres that could possibly be developed at the back of this subdivision. With the increase in load, the existing single-phase line will not be able to service the area.

Brief Description/Scope:

Install a 3 phase line to meet the demand of existing and potential load growth. Install approximately 2,050 feet of underground electrical cable, make terminations, splice, elbows, and test. Install 200 feet of overhead spacer cable, transfer and frame poles.

Barriers:

None anticipated at this time.

Change in Scope of Work From Prior Fiscal Year: Increase (Decrease)
Not applicable.

Status Update From Prior Fiscal Year:

Project Name: 5W5 Andover Access Road Upgrade, W Project #: 121

Project Schedule: CY19 Project Manager: Manole Agouridis, Distribution Engineer

Reason for Expenditure:

This project calls to replace existing open wire primary cable with a 556 AL spacer cable system to improve reliability on the 5W5 circuit. This area has a high density of trees, and has been problematic in the past.

Brief Description/Scope:

Upgrade approximately 1,000 feet of open wire primary cable to 556 AL spacer cable. Poles shall be upgraded as needed. This is a section between Andover Street and Salem Street that runs parallel to I-93 for approximately eight (8) pole spans. This road is referred to as Andover Access Road.

Barriers:

None anticipated at this time.

Change in Scope of Work From Prior Fiscal Year: Increase (Decrease)

Project Name: 211-503 and 211-504 Fiber Extension Project #: 130

Project Schedule: CY19 Project Manager: Nick D'Alleva,

Technical Services Manager

Reason for Expenditure:

NSTAR is replacing existing static wires with optical ground wire (OPGW) to provide a means for diverse fiber communications on the NSTAR system. This project will address the need for fiber to support Northeast Power Coordinating Council (NPCC) Directory 1, high speed, relay protection upgrades required on three terminal lines (211-503 and 211-504) between National Grid's Tewksbury Station #17 and Reading Station #494. This will also enable RMLD to migrate its remote terminal unit (RTU) communications.

Brief Description/Scope:

NSTAR to install 1.4 miles of OPGW static wire and RMLD to install 0.5 miles of OPGW static wire, multiplexer communication equipment, and fiber termination equipment.

Barriers:

None anticipated at this time.

Change in Scope of Work From Prior Fiscal Year: Increase (Decrease)

Project Name: AMI Mesh Network Expansion and **Project #**: 112

Meter Replacement

Project Schedule: Annual Project Manager: Nick D'Alleva,

Technical Services Manager

Reason for Expenditure:

In order to expand RMLD's AMI mesh network, additional relays, retrofit kits, and meters need to be purchased and installed. These new/retrofit meters will give the RMLD the ability to monitor voltage, current, demand, power factor and power quality. They will also provide end-of-the-line voltage, as well as power outage and power restoration notification to RMLD's outage management system.

Brief Description/Scope:

Purchase and install meters and retrofit kits that are compatible with the AMI Mesh Network.

Barriers:

None anticipated at this time.

Change in Scope of Work From Prior Fiscal Year: Increase (Decrease)

Status Update From Prior Fiscal Year:

Project Name: Communication Equipment (for Fiber Optic) Project #: 126

Project Schedule: Annual Project Manager: Peter Price, Senior Distribution

Engineer

Brian Smith, Senior Distribution

Engineer

Reason for Expenditure:

As the RMLD expands its use of the fiber optic network to establish communication with metering equipment, recloser controls, capacitor bank controls and other distribution equipment, the Department will create fiber nodes at various locations along the fiber optic network. Each node will require an enclosure, a fiber optic interface, a power supply, cabling, fiber optic cable, and the termination of the fiber optic cable.

Brief Description/Scope:

Purchase materials and procure fiber optic cable splicers as needed.

Barriers:

None anticipated at this time.

Change in Scope of Work From Prior Fiscal Year:

Status Update:

The Department has expanded the Fiber Optic Network at existing fiber nodes for use with the distribution automation projects.

Project Name: Meters Project #: 117

Project Schedule: Annual Project Manager: Nick D'Alleva,

Technical Services Manager

Reason for Expenditure:

Purchase of meters and metering equipment for new construction, upgrades, and failures.

Brief Description/Scope:

Two hundred residential and commercial meters as well as miscellaneous hardware will be purchases for stock.

Barriers:

None anticipated at this time.

Change in Scope of Work From Prior Fiscal Year:

Not applicable.

Status Update:

PROJECT TOTAL:	\$617,000
----------------	-----------

Project Name: Pole Replacement Program, R, NR **Project #:** 175

Project Schedule: Annual Project Manager: John McDonagh,

General Line Foreman

Reason for Expenditure:

In 2015 RMLD initiated a Pole Inspection Program. Ten percent of RMLD-owned poles are inspected annually by an outside contractor using various technology including resistorgraph technology. This Inspection Program provides RMLD with verifiable data on pole condition. Testing (through FY18), has identified 475 poles that were recommended for replacement. Annual testing takes place each year in the Fall.

Brief Description/Scope:

RMLD will replace 50 poles per year that are identified as part of the Pole Inspection Program. This project includes setting poles, transfers, and replacement of secondary services as needed.

Barriers:

None anticipated at this time.

Change in Scope of Work From Prior Fiscal Year: Increase (Decrease)

Not applicable.

Status Update From Prior Fiscal Year:

Since the inception of the Pole Inspection Program a total of 235 poles have been replaced, and 188 transfers have been completed (as of September 2018).

CAPITAL PROJECT SUMMARY

Project Name: Secondary and Main Replacement Program Project #: 458

Project Schedule: Annual **Project** John McDonagh, General Line Foreman

Manager: All Engineers

Reason for Expenditure:

This preventive maintenance program is intended to upgrade and improve system reliability and address aging infrastructure.

Brief Description/Scope:

This program identifies aging infrastructure and addresses a variety of work to include: secondary upgrades and service drop upgrades as needed. The pole replacements, primary cable replacement and transformer upgrades will be done in conjunction with the Stepdown Area Conversions, Project 107. Two areas will be targeted for upgrade in CY19 in conjunction with the Stepdown Area Upgrades Project 107.

Barriers:

Future upgrades are in Verizon set territory and could result in pole setting delays.

Change in Scope of Work from Prior Fiscal Year: Increase (Decrease)
Not applicable.

Status Update from Prior Fiscal Year:

Not applicable.

CAPITAL PROJECT SUMMARY

Project Name: 13.8kV Upgrade (Step-down Area, etc.) **Project #:** 107

All Towns

Project Schedule: Annual Project Manager: All Engineers

Reason for Expenditure:

There are 35 step-down areas left in the RMLD service territory. These areas on the RMLD distribution system were originally fed from 5 kV distribution circuits. When RMLD began moving load over to the 13.8kV distribution circuits, most areas were converted but some areas were re-fed with pole-mount, step-down transformers. Most of the distribution system in these areas are 30+ years old and in need of upgrade before they can be converted.

Brief Description/Scope:

Replace poles, primary cable, and overhead transformers, as needed, in the various step-down areas. Convert areas to 13.8kV and remove step-down transformers. The secondary cable and service upgrades will be done in conjunction with Project 458.

Barriers:

Some areas are Verizon set areas.

Change in Scope of Work From Prior Fiscal Year:

Not applicable.

Status Update:

A conversion has been completed on Federal Street, Main Street, Vine Street and Timberneck Drive in Reading and Putnam Road, Peter Road and Anthony Road in North Reading. Additional conversions scheduled for completion by December 2018 include Grove Street and McDonald Road in Wilmington, and Adams Street in North Reading.

CAPITAL PROJECT SUMMARY

Project Name: Underground Facilities Upgrades Project #:

(URDs, Manholes, etc.)

Project Schedule: Annual Project Manager: Vaughan Bryan,

Distribution Engineer

John McDonagh, General Line

106

Foreman

Reason for Expenditure:

There are 210 +/- underground residential subdivisions in the RMLD service territory, of which, 90 +/- are over 25 years old. These subdivisions are in need of new primary cable and transformers. Some of the URDs are in step-down areas and need to be upgraded before they can be converted to 7,970 volts. Most of the existing transformers are live-front units. The new padmount transformers will be dead-front units, which will improve reliability by eliminating the possibility of animal contacts within the pad transformer. The new transformers will be placed on box-pads that will raise the transformers out of the mulch beds, which will prevent premature rusting & corrosion of the transformers.

Brief Description/Scope:

Replace primary and neutral cables, and padmount transformers as needed in the various URDs. Some of the transformers within each of these subdivisions have already been replaced. The precast transformer pads will be replaced with fiberglass box pads as needed for elevation requirements. Certain areas will be targeted each year.

Barriers:

None anticipated at this time.

Change in Scope of Work From Prior Fiscal Year:

Not applicable.

Status Update:

The Department completed Shasta Drive, Snowcrest Run, Aspen Road, and Colonial Hill Drive in North Reading, Cherokee Lane, Wilmington, and Wymon Way, Lynnfield. The Department is working to complete Carriage Way and Turner Drive in North Reading, Marion Street Wilmington, Westover Drive, Maddison Lane, and Essex Village, Lynnfield in FY19.

CAPITAL PROJECT SUMMARY

Project Name: Service Connections Project #: various

(Commercial and Residential)

Project Schedule: Annual Project Manager: John McDonagh,

General Line Foreman

Reason for Expenditure:

To install new and upgraded services for both residential and commercial/industrial customers in the service territory.

Brief Description/Scope:

This item includes new service connections, upgrades, and service replacements for residential, commercial, and industrial customers. This represents the time and materials associated with the replacement of an existing or installation of a new overhead service drop and the connection of an underground service, etc. This does not include the time and materials associated with pole replacements/installations, transformer replacements/installations, primary or secondary cable replacements/installations, etc. These aspects of a project are captured under Routine Construction.

Barriers:

None anticipated at this time.

Change in Scope of Work From Prior Fiscal Year

Not applicable.

Status Update:

Not applicable.

CAPITAL PROJECT SUMMARY

Project Name: Routine Construction Project #: various

Project Schedule: Annual Project Manager: Various

Reason for Expenditure:

Routine Construction covers routine activity as well as capital construction projects that develop during the year including, but not limited to items shown below.

Brief Description/Scope:

- Overhead and underground system upgrades
- Miscellaneous projects
- Pole damage
- Station upgrades
- Porcelain cutout replacements
- Street Light Connections new equipment installation
- Pole setting/transfers
- Underground subdivisions (new construction)

Barriers:

None anticipated at this time.

Change in Scope of Work From Prior Fiscal Year:

Not applicable.

Status Update:

Not applicable.

Description of RMLD's Power Supply

Stony Brook Intermediate Unit

The Stony Brook Intermediate Unit is a 354-megawatt, combined-cycle power plant that entered commercial operation in 1981.

The unit's three gas turbines generate electricity using either No. 2 oil or natural gas, with additional electricity produced using a single steam turbine in the combined-cycle process. MMWEC completed construction of a natural gas pipeline to serve the Intermediate Unit in September 2002. The RMLD has a Life of Unit (LOU) entitlement for 14.453% of the unit or approximately 51 Mws. The RMLD has paid off the debt service associated with this project.

Quick Facts – Stonybrook Intermediate Unit

Location Ludlow, Massachusetts

On-Line Date 1981

Fuel No. 2 oil/natural gas

Principal Owner/Operator MMWEC

Total Capacity 354 megawatts

Stony Brook Peaking Unit

The Stony Brook Peaking Unit is a 172-megawatt peaking plant that entered commercial operation in 1982.

The unit's two turbines generate electricity using No. 2 oil. The RMLD has a Life of Unit (LOU) entitlement for 19.516% of the unit which is equivalent to approximately 33 Mws. The RMLD has paid off the debt service associated with this project.

Quick Facts - Stonybrook Peaking Unit

Location Ludlow, Massachusetts

On-Line Date 1982

Fuel No. 2 oil

Principal Owner/Operator MMWEC

Total Capacity 172 megawatts

Braintree Electric Light Department - Watson Unit

The simple-cycle gas fired plant is powered by the first two Rolls-Royce Trent 60 gas turbines built for the U.S. power generation market – known as Watson Units #1 and #2. The units entered commercial operation on June 23, 2009.

Both Watson Units are bid into the ISO New England markety system daily and are dispatched based on their bid price.

The units two turbines generate electricity using natural gas, with No. 2 oil as backup fuel. The RMLD has a 20 year entitlement for 10% of the unit which is equivalent to about 10 Mws.

Quick Facts – Watson Unit

Location Braintree, Massachusetts

On-Line Date 2009

Fuel Natural gas/No. 2 oil

Principal Owner/Operator BELD

Total Capacity 100 megawatts

Seabrook Station

Seabrook Station is a 1,244-megawatt nuclear generating plant located in Seabrook, New Hampshire. An operating license for Seabrook was issued in 1986, but the plant did not begin commercial operation until 1990. The principal owner and operator of Seabrook Station is NextEra Energy Resources LLC, a subsidiary of Florida based FPL

Group, Inc. NextEra owns 88.2% of Seabrook Station. The other owners are MMWEC (11.59%) and two Massachusetts municipal utilities, the Taunton Municipal Lighting Plant (0.13%) and Hudson Light & Power Department (0.08%).

NextEra has announced plans to seek an extension of its Seabrook operating license from the current license expiration of 2030 to 2050. RMLD signed 3 different projects to finance Seabrook, Mix 1, Project 4, and Project 5. The debt service associated with these projects will be paid-off in 2014, 2017 & 2018 respectively. The RMLD has a Life of Unit (LOU) for 0.635% or approximately 8 Mws of the unit.

Quick Facts - Seabrook Station

Location Seabrook, New Hampshire

On-Line Date 1990

Fuel Nuclear – Pressurized Water Reactor

Principal Owner/Operator NextEra Energy Resources, LLC

Total Capacity 1,244 megawatts

Millstone Unit 3

Millstone Unit 3 is a 1,237-megawatt nuclear generating plant located in Waterford, Connecticut. Millstone Unit 3, which began operation in 1986, is the newest and largest of the Millstone Station's three nuclear units, one of which is retired from service. The principal owner and operator of Millstone Station is Dominion Nuclear Connecticut, Inc., a subsidiary of Virginia-based Dominion Resources, Inc. Dominion Connecticut owns 93.4% of Millstone Unit 3.

The Nuclear Regulatory Commission (NRC) on November 28, 2005 approved Dominion Nuclear Connecticut's request for a 20-year operating license extension for Millstone's Unit 3 reactor. The license now expires in November, 2045. RMLD signed two different projects to finance Millstone #3, Mix 1 and Project 3. The debt service associated with these projects will be paid off in 2014 & 2018 respectively. The RMLD has a LOU agreement for 0.404% of the units which equates to approximately 4.6 Mws.

Quick Facts - Seabrook Station

Location Waterford, Connecticut

On-Line Date 1986

Fuel Nuclear – Pressurized Water Reactor

Principal Owner/Operator Dominion Nuclear Connecticut, Inc.

Total Capacity 1,237 megawatts

New York Power Authority (NYPA)

The RMLD receives inexpensive hydroelectric power from the NYPA. RMLD receives capacity and energy from this contract. The Massachusetts Department of Public Utilities (DPU) has appointed MMWEC as the administrator of this contract. The current contract expires in 2025.

Hydro-Quebec Interconnection

The Hydro-Quebec Interconnection is an approximate 2000 Mw, direct current electric transmission line connecting central New England with the Canadian utility Hydro Quebec. Construction of the U.S. portion of the interconnection, which stretches from Groton/Ayer, in Massachusetts to the Canadian border in northern Vermont, was a joint effort of many New England utitilies. The RMLD receives approximately 4.5 Mws of capacity from this contract.

Shell Energy

In November, 2014 the RMLD signed a system power contract with Shell Energy that is effective from January 1, 2015 through December 31, 2018. The RMLD receives enery only from this contract. The amount of energy purchased fluctuates on a monthly basis for both the on-peak and off-peak period. RMLD has secured fixed pricing for this contract.

Exelon

In May, 2015 the RMLD signed a system power contract with Exelon that is effective from January 1, 2016 through December 31, 2019. The RMLD receives energy only from this contract. The amount of energy purchased fluctuates on a monthly basis for both the on-peak and off-peak period. RMLD has secured fixed pricing for this contract.

EDF Trading

In June, 2016 the RMLD signed a system power contract with EDF Trading that is effective from January 1, 2017 through December 31, 2018. The RMLD receives energy only from this contract. The amount of energy purchased fluctuates on a monthly basis for both the on-peak and off-peak period. RMLD has secured fixed pricing for this contract.

NextEra

In June, 2016 the RMLD signed a system power contract with NextEra that is effective from January 1, 2019 through December 31, 2020. The RMLD receives energy only from this contract. The amount of energy purchased fluctuates on a monthly basis for both the on-peak and off-peak period. RMLD has secured fixed pricing for this contract.

NextEra

In December, 2017 the RMLD signed a master agreement as well as a Transaction Facilitation Agreement with NextEra that enables RMLD to leverage NextEra's trade floor. RMLD approved a Risk Management Strategy that secures transactions based on price and time triggers. The Risk Management Strategy will permit RMLD to take advantage of price opportunities consistently over the next several years and beyond. This strategy will allow RMLD to secure monthly quantities that are below the four year average versus locking in annual quantities. Additionally, the strategy of utilizing time triggers will smooth out variations in the market over time.

Eagle Creek Energy Holdings

In March, 2011 the RMLD signed a purchase power agreements with Swift River Hydro LLC for the output of four hydro systems located in Massachusetts that are effective from February 1, 2011 through January 31, 2026. The Swift River Trading Company is the lead market participant for and represents these hydroelectric generators with a total nameplate capacity of approximately 7 Mws and average annual generation of 25,000 megawatt-hours per year.

These facilities include the Woronoco Hydro facility in Russell, MA, Pepperell Hydro in Pepperell, MA; Indian River Power Supply in Russell, MA; and Turners Falls Hydro in

Turners Falls, MA. Each of these facilities is owned by a special purpose entity, e.g., the Woronoco facility is owned by Woronoco Hydro LLC. In 2016, Swift River Trading Company assigned the projects to Eagle Creek Energy Holdings. The four facilities are now managed by the Eagle Creek Energy Holdings as the lead market participant for each of the facilities. RMLD is the only buyer.

- Pepperell Hydro: 15 year term beginning on February 1, 2011 and ending January 31, 2026. RMLD is purchasing all of the products produced by or attributable to the facility. The facility has a nameplate capacity of 1.9 Mws. The products include, but are not limited to, Energy, Installed Capacity, Ancillary Services, Renewable Energy Certificates and Environmental Attributes (to the extent not included in the RECs). The contract price for these products is \$100/Mwh for the first year, escalated 2.25% thereafter.
- Woronoco Hydro: 15 year term beginning on February 1, 2011 and ending January 31, 2026. RMLD is purchasing all of the products produced by or attributable to the facility. The facility has a nameplate capacity of 2.7 Mws. The products include, but are not limited to, Energy, Installed Capacity, Ancillary Services, Renewable Energy Certificates and Environmental Attributes (to the extent not included in the RECs). The contract price for these products is \$100/Mwh for the first year, escalated 2.25% thereafter. The facility is not currently qualified for FCM. Until the Seller qualifies the facility for FCM the contract price is reduced by \$5.00/Mwh.
- Turners Falls Hydro: 15 year term beginning on February 1, 2011 and ending January 31, 2026. RMLD is purchasing all of the products produced by or attributable to the facility. The facility has a nameplate capacity of 1 Mw. The products include, but are not limited to, Energy, Installed Capacity, Ancillary Services, Renewable Energy Certificates and Environmental Attributes (to the extent not included in the RECs). The contract price for these products is \$100/Mwh for the first year, escalated 2.25% thereafter. The facility is not currently qualified for FCM. Until the Seller qualifies the facility for FCM the contract price is reduced by \$5.00/Mwh.
- Indian River Hydro: 15 year term beginning on February 1, 2011 and ending January 31, 2026. RMLD is purchasing all of the products produced by or attributable to the facility. The facility has a nameplate capacity of 1.4 Mws. The products include, but are not limited to, Energy, Installed Capacity, Ancillary Services, Renewable Energy Certificates and Environmental Attributes (to the

extent not included in the RECs). The contract price for these products is \$100/Mwh for the first year, escalated 2.25% thereafter. The facility is not currently qualified for FCM. Until the Seller qualifies the facility for FCM the contract price is reduced by \$5.00/Mwh.

Collins Hydro

In August, 2013 the RMLD signed a purchase power agreements with Swift River Hydro LLC.for the output of Collins Hydro located in between Ludlow and Wilbraham Massachusetts. The contract with Swift River Hydro is effective from September 1, 2013 through August 31, 2028. The RMLD receives enery only from this contract. The average annual generation is approximately 5,667 megawatt-hours per year.

Pioneer Hydro

In August, 2013 the RMLD signed a purchase power agreements with Ware River Power Inc. for the output of Pioneer Hydro located in Ware, Massachusetts. The contract for Pioneer Hydro is effective from September 1, 2013 through August 31, 2028. The RMLD receives enery only from this contract. The average annual generation is approximately 4,480 megawatt-hours per year.

Hoisery Mills Hydro

In March, 2014 the RMLD signed a purchase power agreements with Silver Street Hydro Inc. for the output of Hosiery Mills located in Hillsborough, New Hampshire. The contract for Hosiery Mills Hydro is effective from March 1, 2014 through February 28, 2034. The RMLD receives enery only from this contract. The average annual generation is approximately 2,046 megawatt-hours per year.

Aspinook Hydro

In August, 2016 the RMLD signed a purchase power agreements with Aspinook Hydro Inc. for the output of Aspinook Hydro located in Connecticut. The contract is effective from August, 2016 through August, 2017. The RMLD receives enery only from this contract. The average annual generation is approximately 9,300 megawatt-hours per year.

Saddleback Ridge Wind

In December, 2013 the RMLD signed a purchase power agreement with Saddleback Ridge Wind, LLC for the output of Saddleback Ridge Wind located in Carthage, Maine. The contract for Saddleback Ridge Wind is effective from January 1, 2015 through December 31, 2035. The RMLD receives enery plus all attributes this contract. The average annual generation is estimated to be approximately 15,820 megawatt-hours per year.

Jericho Wind

In November, 2014 the RMLD signed a purchase power agreements with Jericho Power, LLC for the output of Jericho Wind located in Berlin, New Hampshire. The contract for Jericho Wind is for 20 years. The project went Commercial December, 2015. The RMLD receives energy plus all attributes from this contract. The average annual generation is estimated to be approximately 10,788 megawatt-hours per year.

One Burlington - Solar

In March, 2015 the RMLD signed a purchase power agreement with CREECA Energy LLC for the output of 2,000 kW AC solar array located at One Burlington Ave., Wilmington, Massachusetts. The solar array went on-line in November, 2015. The term of the contract for One Burlington is effective for ten years. The average annual generation is estimated to be approximately 3,450 megawatt-hours per year.

Altus Power – Community Solar

In March, 2016 the RMLD signed a purchase power agreement with ECA Solar LLC for the output of 1,000 kW AC solar array located at 326 Ballardvale Street, Wilmington, Massachusetts. The solar array went on-line in June, 2017. In May, 2017 the contract was assigned to Altus Power America, Inc DBA WL MA Solar LLC. The term of the contract for WL MA Solar LLC is effective for twenty years. The average annual generation is estimated to be approximately 1,700 megawatt-hours per year. RMLD has developed a Community Shared Solar program called Solar Choice. This project is RMLD's first Solar Choice project and is fully subscribed by 500 residential customers.

Kearsage – Community Solar

In October, 2017 the RMLD signed a purchase power agreement with Kearsage Wilmington LLC for the output of 1,800 kW AC solar array located at 40-50 Fordham Road, Wilmington, Massachusetts. The solar array went on-line in February, 2018. The term of the contract for Kearsage Wilmington LLC is effective for twenty years. The average annual generation is estimated to be approximately 2,376 megawatt-hours per year. This project is RMLD's second Solar Choice project and is fully subscribed by 617 residential/commercial customers.

Energy Storage – NextEra

In December, 2017 (RMLD) was recently awarded a \$1 million grant for the installation of an energy storage unit at its North Reading substation. The grant is funded by the Department of Energy Resources (DOER). RMLD's project consists of installing a 5-megawatt Lithium Ion Battery unit at its North Reading substation to reduce peak demand, thereby lowering future transmission and capacity costs related to the purchase of wholesale electricity. The battery unit will be co-located with RMLD's new 2.5-megawatt Distributed Generator. RMLD is negotiation an Energy Storage Agreement with NextEra. The Energy Storage unit is expected to be on-line by December, 2018.
