Press Release

RMLD Invites Customers to Learn About Electrification at a Virtual Event on June 7, 2021 at 2:30 pm

Reading, MA – The Reading Municipal Light Department (RMLD) is partnering with the Wilmington Memorial Library, the Flint Memorial Library, and the Reading Public Library to present a free virtual event, *How Electrification Benefits the Environment*, on Monday, June 7, 2021 at 2:30 pm.

Electrification is the shift to powering devices with electricity instead of fossil fuels. Examples include electric vehicles, heat pumps for HVAC, and electric yard tools. Increasing electrification is critical to reducing greenhouse gas emissions.

Join RMLD to learn how electrification benefits the environment by reducing these carbon emissions, and how you can help. Electrification in the transportation and building sectors will be discussed. RMLD will also review its related programs, initiatives, and available rebates to facilitate electrification within the communities it serves.

A question-and-answer session will close out the virtual event. The session will be recorded and posted online for those unable to attend live.

To register, please visit <https://www.rml.com/home/news/upcoming-event-how-electrification-benefits-environment>.
