

The Heat Pump Rebate Process

① Decide you want a Heat Pump

② Have a Consultation with Abode

③ Choose a Contractor, Abode has a list or you can find your own.

④ Have your contractor submit an optional pre-approval application

⑤ Install the System!

This is arranged by your contractor

a AND b must happen

⑥a Contractor Submits a Post Install Form to Abode

⑥b The town conducts a wire inspection on the system

⑦a Abode Reviews the Post install documentation and submits it to RMLD

⑦b The town sends the "WireOK" to RMLD

This usually takes a week, if all the information from the form is correct the first time.

⑧a RMLD reviews the post install documentation and updates their records

⑧b RMLD reviews the "WireOK" and updates their records

If you feel like your rebate should be here by now RMLD is likely waiting for the town to send the WireOK

⑨ RMLD NEEDS BOTH THE WIREOK AND THE POST INSTALL DOCUMENTATION TO BE COMPLETED CORRECTLY AND IN HAND BEFORE A CHECK CAN BE ISSUED

⑩ Checks are sent out every 2 weeks. It could take up to two weeks from RMLD receiving all your documentation before a check is sent out. And then it takes a few days to get to you via mail.

⑪ Sit back relax and enjoy your new home HVAC system!
